

Wainaina Gathecha

Frontend Developer

Nairobi, Kenya | wainainagathecha@gmail.com | github.com/WainainaGathecha | my-portfolio-p2xe.vercel.app

PROFESSIONAL SUMMARY

A hands-on developer with experience delivering production web applications for real clients. I bring a systems-thinking mindset to every project while focusing on understanding architecture decisions, not just implementing them. My work spans UI design, data rendering, web performance optimization and production deployment with experience managing client relationships and translating business requirements into functional products.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: Tailwind CSS v4, React

Tools & Workflow: Git, GitHub, npm, Vercel

Concepts: DOM manipulation, data-driven rendering, responsive design, component-based architecture, REST API integration, Core Web Vitals optimization, SEO & meta tags, accessibility fundamentals

Soft Skills: Client communication, project scoping, self-directed learning

PROJECTS

Smart Kings Auto Tyres — Client Website smarkingsautotyres.co.ke 2025

Stack: *Vanilla JavaScript, Tailwind CSS, HTML5, CSS3*

- Built and shipped a full production website for a tyre shop in Nairobi, managing the project from design conception through deployment and client handover
- Built a tyre catalogue system with multi-criteria product filtering and data-driven rendering patterns.
- Integrated WhatsApp pre-filled message links on all product enquiry CTAs, enabling direct customer to business conversion without a contact form.
- Optimized mobile Core Web Vitals: improved performance score from 77 to green by eliminating 2,210ms of render-blocking time - deferred Fonts and Icon libraries, added preconnect hints and inlined critical CSS.
- Configured full SEO setup: canonical tags, Open Graph and Twitter Card meta pointing to the custom domain; resolved Vercel deployment URL leaking as canonical

Personal Portfolio my-portfolio-p2xe.vercel.app/ 2026

Stack: *HTML5, CSS3, JavaScript*

- Designed and built a personal portfolio with a two-column sticky layout, presenting work and experience in a clean, scannable format
- Optimised for performance and responsiveness across devices.
- Implemented a custom cursor spotlight effect and IntersectionObserver-driven active navigation highlighting with no external libraries
- Wrote all copy around real client outcomes and technical decisions, deliberately avoiding junior-framing language.

ADDITIONAL

Actively learning emerging frontend technologies and building toward full-stack capabilities. Comfortable working independently, communicating async, and shipping on time. Available for remote work globally.
